Profile

I am a Junior UX/UI Designer & Front-end Developer with a passion for product design, user experience, and digital innovation. I enjoy transforming complex challenges into intuitive, user-friendly, and visually engaging digital experiences.

Through my education and internship, I have gained experience in user research, user flows, design systems, interactive prototyping, and front-end development. My background in web development enables me to bridge the gap between design and technology, creating solutions that are both visually appealing and technically feasible.

I am committed to continuously expanding my skills, furthering my education in the Bachelor's programme Digital Design & Development (Devine), and contributing to meaningful digital products through collaboration and hands-on experience.

Skills

 Web Design	 Motion graphics	 User Experience	 Wireframe	 Prototype	 Design System
 Javascript	 HTML	 (s)css	 Client side Fetch API	 Vite.js	 Craft CMS
